Sprint Retrospective Report

Sprint 1

What went well:

- **Coordination between the group**
- **UI/UX Design**
- **Front-End for all the pages**
- **Deployment**

What didn't go well & challenges:

- **Managing to finish some backend stuff allocated for Sprint 1**
- **Schedule planning**
- **Some miscommunication**
- **Took a bit of time on learning the different languages**

How did you handle these challenges:

- **Did online meetings weekly**
- **Planned on doing 15 minutes Scrum Meetings after every CMPS271 class**
- **Got some feedback from Dr Zalghout about learning through the process**

What could be improved

- **Speed of the group**

Lessons Learned

- **Agile flexibility is key in managing evolving project requirements.**
- **Continuous user feedback enhances feature development.**
- **Prioritizing key functionalities helps maintain project momentum.**

Action items for sprint 2:

- **Finalize any pending user stories from Sprint 1.**
- **Enhance UI/UX elements based on feedback from Philosophy Professors.**
- **Optimize website performance and security.**
- **Working on the Database**
- **Deployment with Backend**
- **Connecting Front-End with Backend**
